Summary

Data Analyst with hands-on experience in analysing large datasets to generate actionable insights and support business decision-making. Proficient in Python, SQL, and Power BI with a strong focus on data quality, reporting, and performance optimisation. Experienced in stakeholder collaboration, requirement understanding, and delivering data-driven solutions. Currently pursuing a Master of Data Science at RMIT University.

Skills

Programming: Python, R, SQL

Data tools: Excel, Power BI, Tableau, Jupyter Notebook

Technologies: Pandas, NumPy, Scikit-learn, Streamlit, Flask, MongoDB, Git, GitHub

Data: Data Analysis, Data Cleaning, Data Visualisation, KPI Reporting

Soft skills: Communication, Teamwork, Problem Solving, Stakeholder Management

Education

Master of Data Science

RMIT University – Melbourne, Australia

Feb 2025 – Dec 2026 (Expected)

3.4/4.0 GPA (Upto 2nd Semester)

Bachelor of Technology in Information Technology

Jeppiaar Institute of Technology – India

Aug 2016 – Nov 2020

3.12/4.0 GPA

Experience

Data Analyst

Feb 2024 – Feb 2025

Smartfusion Corporate Solutions Pvt Ltd – Chennai, India

- Processed and analysed **over 1M** operational records using Python and SQL to identify patterns, trends, and support data-driven decision-making.
- Performed exploratory data analysis and statistical evaluation to identify key performance indicators and operational insights.
- Automated data cleaning and validation processes, improving reporting accuracy and **data reliability by 30%**.
- Developed interactive Power BI dashboards to visualise operational metrics and enhance stakeholder visibility.
- Communicated analytical findings and insights to cross-functional teams to support process improvements and business outcomes.

Client Partner

Nov 2021 – Apr 2023

Access Healthcare – Chennai, India

- Analysed healthcare claims datasets to identify denial patterns and improve approval workflows.
- **Increased approval outcomes by 40%** through structured data tracking, performance monitoring, and trend analysis.
- Generated performance reports to monitor operational efficiency and reduce processing delays.

Junior Consultant (Internship)

Oct 2020 – Nov 2020

Tasksent – Chennai, India

- Conducted campaign and audience data analysis to support targeted digital marketing strategies.
- **Improved website visibility and traffic by 25%** using SEO optimisation and structured performance tracking.

Projects

Credit Card Fraud Detection Using Generative Adversarial Networks (GANs)

Python, TensorFlow, Scikit-learn, Pandas

- Developed a fraud detection model using an **imbalanced dataset containing 284K+ credit card transactions**.
- Implemented GAN-based data augmentation to generate synthetic fraud samples and address class imbalance.
- Compared GAN augmentation with **SMOTE, ADASYN, and other resampling techniques**.
- Evaluated Random Forest models using Precision, Recall, F1-score, and ROC metrics for imbalanced classification.

InfoMate – AI Chatbot

Python, Streamlit, GPT-4, MongoDB

- Developed an NLP chatbot using structured and unstructured university-related datasets.
- Applied text preprocessing and embedding techniques to improve contextual response accuracy.
- Deployed an interactive web application using Streamlit for real-time user interaction.

Certifications & Volunteering

Python Bootcamp – Udemy

Data Analysis Bootcamp – Udemy

Deloitte Australia Data Analytics Job Simulation – Forage

Commonwealth Bank - Introduction to Data Science Job Simulation - Forage

Event Volunteer – PMI Melbourne Chapter (2025 – Present)

Event Crew – RMIT Open Day (2025)
