Summary

Master of Data Science student at RMIT University with strong analytical and problem-solving skills and experience analysing large datasets using Python, SQL, and Excel. Experienced in data analysis, statistical evaluation, and dashboard development to support data-driven decision-making. Skilled at interpreting numerical data, identifying trends, and communicating insights clearly to stakeholders. Interested in applying analytical thinking and technical skills within professional services and advisory environments.

Skills

Programming: Python, R, SQL

Data tools: Excel, Power BI, Tableau, Jupyter Notebook

Technologies: Pandas, NumPy, Scikit-learn, Streamlit, Flask, MongoDB, Git, GitHub

Data analysis: Exploratory Data Analysis, Statistical Analysis, Data Cleaning, Data Interpretation

Soft skills: Communication, Teamwork, Problem Solving, Critical Thinking

Education

Master of Data Science

Feb 2025 – Dec 2026 (Expected)

RMIT University – Melbourne, Australia

Bachelor of Technology in Information Technology

Aug 2016 – Nov 2020

Jeppiaar Institute of Technology – India

Experience

Data Analyst

Feb 2024 – Feb 2025

Smartfusion Corporate Solutions Pvt Ltd – Chennai, India

- Processed and analysed over 1M operational records using Python and SQL to identify patterns, trends, and support data-driven operational decisions.
- Performed exploratory data analysis and statistical evaluation to uncover key performance indicators and operational insights.
- Automated data cleaning and validation processes, improving reporting accuracy and overall data reliability by 30%.
- Developed interactive Power BI dashboards to visualise operational metrics and improve stakeholder visibility.
- Communicated analytical findings and insights to cross-functional teams to support process improvements and decision-making.

Client Partner

Nov 2021 – Apr 2023

Access Healthcare – Chennai, India

- Analysed healthcare claims datasets to identify denial patterns and improve approval workflows.
- Increased approval outcomes by 40% through structured data tracking, performance monitoring, and trend analysis.
- Generated performance reports to monitor operational efficiency and reduce processing delays.

Junior Consultant (Internship)

Oct 2020 – Nov 2020

Tasksent – Chennai, India

- Conducted campaign and audience data analysis to support targeted digital marketing strategies.
- Improved website visibility and traffic by 25% using SEO optimisation and structured performance tracking.

Projects

Credit Card Fraud Detection Using Generative Adversarial Networks (GANs)

Python, TensorFlow, Scikit-learn, Pandas

- Developed a fraud detection model using an imbalanced dataset containing 284K+ credit card transactions.
- Implemented GAN-based data augmentation to generate synthetic fraud samples and address class imbalance.
- Compared GAN augmentation with SMOTE, ADASYN, and other resampling techniques.
- Evaluated Random Forest models using Precision, Recall, F1-score, and ROC metrics for imbalanced classification.

InfoMate – AI Chatbot

Python, Streamlit, GPT-4, MongoDB

- Developed an NLP chatbot using structured and unstructured university-related datasets.
- Applied text preprocessing and embedding techniques to improve contextual response accuracy.
- Deployed an interactive web application using Streamlit for real-time user interaction.

Certifications & Volunteering

Python Bootcamp – Udemy

Data Analysis Bootcamp – Udemy

Deloitte Australia Data Analytics Job Simulation – Forage

Commonwealth Bank - Introduction to Data Science Job Simulation - Forage

Event Volunteer – PMI Melbourne Chapter (2025 – Present)

Event Crew – RMIT Open Day (2025)
